

# WEBINAR

## How to support teaching and learning innovation? Ideas from the 2022 New Learning Award

16 NOVEMBER 2022, 14:00 – 15:00 CET

ONLINE

Organized by ETF

---

### SUMMARY:

The webinar will provide an overview of the results of the 2022 ETF Call for innovative teaching and learning practices, both analysing the mostly targeted areas of innovation and briefly presenting the ten finalists practices that have been selected out of the 800+ received applications.

Starting from these reflections, we will engage in a discussion with ETF and international experts on what kind of support would be needed for successful teaching innovations to flourish and scale.

The practices deal with a number of topics, covering different themes related to innovative approaches and methodologies in education, such as gamification, safety, social inclusion, students engagement, critical and design thinking, digital technologies and more.

The results of the webinar will represent the starting discussion points of the 2022 ETF New Learning Event foreseen on 28-29 November 2022.
