Where our companies come from

Atfield Technologies

Contact person: Srdjan Tadic

Country: Serbia

Website: <https://www.atfield.tech/>

Sector: ICT

Activity: Winessense TM – Decision support system for vineyard management. Developing enabling tools for autonomous agriculture.

Skills: *Hyperlocal disease and yield quality prediction for grapes. System based on mechanistic infection models that depend on specifics of microclimate of each hectare of vineyard.

*In-house hardware, software and algorithmic solution carefully proven on large vineyard areas over multiple seasons. Ultra-low power no-maintenance dense sensor network tailored for viticulture (solar powered, self-localized, no cables). Satellite data used for initial exploration of new sites and recommending sensor positions.

*In development – Battery-less (lithium-free) wireless sensor network for viticulture.

The team is composed by a staff of 15 engineers already engaged in several research projects with local and foreign universities and research centres. Over 100 years of combined engineering experience in development of embedded systems and signal processing and data analysis algorithms.

Stage of development:

System widely deployed in 4 countries, including USA. Improving product scalability and expansion in international markets. Development of models for predicting biochemistry of grapes.

What they are looking for:

The company is looking for vineyard companies to be involved as end users, but is also looking for local experts in viticulture and companies involved in agri-tech or researchers for pilot experiments. Open for cooperation with Universities.

Biofor_System Microbial Technology

Contact person: Bogdan Zicic

Country: Serbia

Website: <http://biofor.rs/>

Sector: biotechnology

Activity: Production biostimulators, microbial improvers of soil, decomposters, inoculants for soya and other seeds. (Base on selected usefull bacteria strains and fungi from soil. Service of bioremediation (degradation of organic pollutants in soil)

Skills: Scientific background in ecological microbiology, own production line based on R&D, patent application for some products.

Stage of development:

Growth of domestic and abroad market. Sale is doubled in last two years. The company has been set up 16 years ago.

What they are looking for:

The company is interested in an exchange of knowledge in the area of plant nutrition. In particular they are looking for support analysis in bioactive substance in biofertilizers, potential partners in import/export inputs for agriculture. The company developing bioinsecticide and biofungicide and they need technical assistance in this process.

Carnomed

Contact person: Nenad

Country: Serbia

Website: <https://carnomed.rs/>

Sector: agrofood

Activity: food supplements based on natural ingredients

Skills: Strong base in R&D and collaboration with university research centres. Developing new ingredients and final products. Conducting and publishing pre-clinical and clinical studies.

Stage of development: An established company, exporting to the Balkan region, EU, UK, USA and Australia.

What they are looking for:

We look for joint research projects with university institutions with focus on food supplements applied science.

Chia Dia

Contact person: Nadika

Country: North Macedonia

Website: www.chiadia.com

Sector: Agrofood

Dia.

Activity: Producers of healthy and organic beverages with core values for sustainability, high nutrition and innovation. Usage of organic, natural fruit and herbal ingredients. Eco-glass bottle and label.

Skills: Family owned business

Stage of development:

Business in growth - currently working in North Macedonia, with a possibility to expand in Western Balkans (already made deals with Kosovo and negotiation with Albanian market).

What they are looking for:

The company is interested in expanding the business abroad. In particular, they are looking for new clients and distributors (HORECA system, gas stations, supermarkets, airports, gyms, healthy stores etc.).

Dron Ops LLC

Contact person: Vancho Navrov

Country: North Macedonia

Website: <https://droneops.eu>

Sector: Digital/drones

Activity: Production of drones and wide selection of overflights to suit your specific needs. Unmanned aerial vehicles are equipped with obstacle avoidance capability and are adapted for both external and internal inspections and are able to navigate very close to infrastructures.

Skills: Expertise in the use of drones in the Agricultural sector (e.g. crop spraying and seeding, risks prevention, health monitoring of soil and plants, mapping and survey of large areas to develop multispectral and orthomosaic maps etc...) + other services like cleaning skyscrapers and solar panels.

Stage of development: start-up company (already on the market)

What they are looking for:

The company is interested in cooperation agreements to sell their products/services in the EU. Potential contacts with Agricultural sector companies, Leonardo and also Innovation departments of similar companies for peer to peer experiences, new trends etc.

DunavNET

Contact person: Nemanja Misic – Senka Gajinov

Country: Serbia & Ireland

Website: <https://dunavnet.eu/>

Sector: ICT

Activity: turnkey IoT solutions to help develop business and everyday life into smarter, safer, and more efficient environments. The company portfolio of solutions for the food supply chain, transport, environment, and recently for elderly care is built using standardized, enterprise-grade technologies and components. In particular, for the food sector the company developed:

Farming: agroNET, poultryNET, siloNET, fleetNET, and product passport solutions which represent the company digital farming platform. It acts as a hub with a range of modules supporting efficient organization and execution of multiple operations on the farm.

Food and beverage production: factoryNET, fleetNET, and Product passport solutions which represent the company digital platforms for factory automation, transport management and creation of digital interaction channels on top of the food and beverage product items.

Skills: agile, dynamic, and experienced team, capable of quickly delivering high-quality results and taking the full responsibility for development and maintenance of complete applications and products. After a decade of active involvement in the IoT domain, we created a strong ecosystem of partners with whom we can rapidly design, implement, deliver, and deploy turnkey IoT/AI solutions. DUNAVnet ecosystem combines companies, domain experts and researchers, ensuring that they have access to the most suitable sensors, gateways, communication, cloud, and data analytics expertise as well as domain specific knowledge required to create adequate guidance and recommendations to the end users (farmers), and the appropriate business development and sales channels.

Stage of development: Expansion stage

What they are looking for: System integrators specialised in AI and IOT devices for agriculture for technical cooperation agreements and farmers or manufacturers as end users

Eco Solution Research

Contact person: Alberina Gash, Kaltrina Osmani

Country: Kosovo

Website: <https://www.linkedin.com/company/eco-solution-research/>

Sector: Chemical/Renewable Energy

Activity: The SMART goal of this project is to connect chemical engineering and architecture to provide sustainable solutions in urban and environmental spaces. This will be made possible through bioproducts and biofuels which will be very positive for the environment by producing renewable energy and reducing greenhouse gas emissions, significantly increases water infiltration into soil and improving its fertility to preserve and supply essential nutrients. All research is based on the concepts of sustainability, reproduction and eco-industries, with particular emphasis on the 2030 Agenda and the Sustainable Development Goals. Currently, they are developing the first prototype of an organic fertilizer from food waste.

Skills: A woman-run company that protects the environment from poisoning. A team of excellent six researchers, experts of different fields striving for the best ecological solution.

Stage of development: Early Stage (Development of the Prototype)

What they are looking for: The company is looking for investors to proceed with the development of the first prototype, technical partners or for possible contact with EIC. The requested partners must operate in the organic fertilizers and biogas production sectors. Moreover, we are looking for collaborations with research institutions in the field of chemistry and sustainable urban planning.

Fara

Contact person: Enis Hyseni

Country: Kosovo

Website: <http://fara.io>

Sector: Electronics/Mechatronics/Software

Activity: professional service and product provider in the field of information technology developing local tailor-made products, incl. automated smart farm solutions for digital monitoring and controlling of farmlands

Skills: Building solutions that do not exist but make people's lives easier. Making existing solutions in the market, but only if we can produce it at least 50% cheaper.

Stage of development: an established company active since 2015, with activities implemented in Kosovo, Albania, North Macedonia and Montenegro

What they are looking for:

They are looking for companies that need hardware solutions, but also universities and technological parks

Farmbot doo

Contact person: Branislav Veskovic

Country: Serbia

Website: <https://soter.rs/>

Sector: Robotics/ICT

Activity: Multi-functional robotic platform with autonomous movement capability for agrofood manufacturers

Skills: patent pending floating tool chassis system

Stage of development:

Product development and testing of production model with early adopters

What they are looking for:

The company is looking for vineyard producers and fruits producers in order to offer their technologies (end users), but is also looking for sensors/artificial intelligence companies and software developers. They are looking for possible contact with EIC.

Green Agro

Contact person: Tanja Kotevska (tanya@greenagro.mk)

Country: Macedonia

Website: <http://greenagro.mk/>

Sector: Agrofood

Activity: Animal nutrition products, consulting, solutions. Development of probiotics for animals and research in the usage of insects for animal and human food.

Skills: Greenagro is one of the first companies on the market for forage mixtures and components for animal feed in North Macedonia. The company has set high standards and quality with the sales of concentrates and premixes of global brands for animal feed .

Stage of development:

Products already on the market, launch of new product (probiotic for animals), plans for future development of the product to extraction of nutraceuticals from microorganisms (MOS, betaglucans, nucleotides etc.)

What they are looking for:

The company is looking for contacts with other animal nutrition companies, micro-biologists and bio-engineers for further development of the production. Entomologist, with experience of rearing insects. Partners for distributing probiotic and other feed additives.

Hojeza

Contact person: Egesa Meto

Country: Albania

Website: <https://hojeza.al/>

Sector: Agrofood

Activity: Producers of high quality bee products (honey, pollens, propolis etc...)

Skills: Family owned business

Stage of development:

Business in growth (actually working just in Albania).

What they are looking for:

The company is interested in expanding the business abroad. In particular, they are looking for clients but also for support and assistance in digital marketing, information about export in other countries, etc.

Natural Alba

Contact person: Irene Tosti

Country: Albania

Website: in construction

Sector: Agri-business / Medicinal and aromatic plants

Activity: production, processing, and export of endemic medicinal and aromatic plants (endemic MAPs)

Skills: The company deals with the selection, cultivation, processing, and export of organic endemic MAPs according to the requirements of the nutraceutical sector in terms of active ingredients.

Stage of development:

already exporting to the EU-countries, Switzerland, and China

What they are looking for:

The company is looking for digital farming technologies/tools for precision/small scale farming, in particular they are looking for new application/devices to investigate plants genotypes.

Organauts

Contact person: Gorgi Gorgievski

Country: North Macedonia

Website: <https://organauts.mk>

Sector: Agrofood

Activity: production of organic food

Skills: The company deals with the production of healthy and organic foods from Balkan region (e.g. sweets from grape must, vegetables, juices, jam, organic food for babies etc...)

Stage of development: products already on the market, available in North Macedonia (potential contact with Italy, Serbia, Slovenia, Austria and Sweden).

What they are looking for:

The company is looking for distributors in other countries (organic/bio-shops, distributors with their own shops...) and companies with their own recipes wishing to produce in North Macedonia (cheaper costs).

PRO-FIT VIS

Contact person: Ivona Trajanovska

Country: North Macedonia

Website: <https://pro-fit.mk/>

Sector: Agrofood

Activity: production of functional food products

Skills: Family business, the company deals with the production of healthy and functional food products

Stage of development: the company has started its own production of high protein crackers (low carb), new version with Italian flavour in progress. The product is available only in North Macedonia (exclusivity contract with local supermarkets for 1 year).

What they are looking for:

The company is looking for distributors in other countries (organic/bio-shops, distributors with their own shops...) and similar companies with their own production in order to exchange know how, improve the production and marketing.

Santefruit

Contact person: Verina

Country: Kosovo

Website:

<https://www.linkedin.com/company/santefruit/?originalSubdomain=pe>

Sector: agrofood

Activity: Production of blueberries

Skills: Founded in 2016, Santefruit is located in the northeastern part of Kosovo at an altitude of 720 meters above sea level in one of the cleanest environments, making it perfect to achieve quality goals. With almost 6 years of experience in blueberry farming, currently, Santefruit owns an orchid of 10 hectares of blueberries with 3 varieties and have a long season, starting from early June till the end of September

Stage of development:

Santefruit was founded in 2016 with 4 hectares, and now we have 10 ha of blueberries, an antihail net, a digital irrigation system, and a cold storage.

What they are looking for:

The company is willing to increase export, but they need a sorting machine able to separate high quality blueberries from bad ones, in order to enhance the quality of their final product. They furthermore need trainings in the agronomic field in order to become professional agronomists

Zemra Farm

Contact person: Fitore Ukiqi

Country: Kosovo

Website: <https://zemra.farm/>

Sector: agrofood

Activity: raspberries, vegetables, aromatic herbs production

Skills: Processing and production of cold press juices, dried fruits and herbs, cookie production

Stage of development:

The goal of the company is to increase of production and cultivation of raspberries and aromatic herbs by 50%, They would like to develop innovative food processing with new technologies in order to gain knowledge on digital and sustainable transition in the agri-food sector with potential partners

What they are looking for:

The company needs to connect with successful partners in order to ensure the skill for innovative technology in the field of agri-food sector as well as to procure new equipment that will boost production.

Piemonte Agrofood Technology Parks & Innovation Poles profiles

een.ec.europa.eu

CAMERA DI COMMERCIO
INDUSTRIA ARTIGIANATO E AGRICOLTURA
DI TORINO

Agrifood Innovation Pole

Contact person: Dario Vallauri – M.I.A.C. Scpa (Cluster Managing Organization)

Country: Italy

Website: <https://www.poloagrifood.it/site/homepage>;
<https://www.clustercollaboration.eu/cluster-organisations/miac-scpa-polo-agrifood>

Activity:

The innovation cluster Polo AGRIFOOD is a network of more than 190 (mostly food&drink SMEs), research centers and academia.

The mission is to support SMEs and cluster members in identifying their needs and setting up plans for innovation, R&D and technology transfer.

The support to cluster members is provided by means of R&D projects building, demonstration/TT activities, training and education and fund raising.

Skills: expertise in the fields of food technologies, traceability, product/process innovation, microbiology, food safety and sustainability.

What are you looking for:

Cluster to cluster collaboration; project consortia for participation to EU R&DI calls; international networking

Environment Park – Clever Innovation Pole

Contact person: Barbara La Licata

Country: Italy

Website: <https://www.envipark.com/en/>

Activity: Environment Park SpA is a Scientific and Technological Park located in Turin (Italy), founded in 1996. The Parks has about 30 employees and its activities are divided into two business units: Innovation & Development and Real Estate Services. The Environment Park through Green Chemistry sector has participated in a number of regional, national and European projects on biomass exploitation so far, carrying out research, technology transfer, education and dissemination activities and promoting biomass valorisation for bio-chemicals extraction and energy production.

Skills: Environment Park with the Green Chemistry sector has more than ten years of experiences in biomass treatment and exploitation, for energy production and for biochemical and fuel generation. The Park has cooperated with private and public sectors in the definition of the best innovative solutions for organic wastes and by-products valorization. Beside this has participated in a lot of cooperation programs with solution applied to urban contexts for circular economy processes implementation and can count on its facilities for laboratory and pilot scale tests on these topics. Beside the real estate and the research activity, the Park manages also the Clean Tech Cluster of Piedmont Companies (about 300 SMEs and Large industries).

What are you looking for:

Collaboration within European Programmes and B2B collaboration

Proplast – Plastics Innovation Pole

Contact person: Marta Zaccone

Country: Italy

Website: <https://www.proplast.it/en/>

Activity: Researcher and Project manager in plastic materials sector, in Proplast research centre specialised in technical innovation of plastic materials

Skills: Technical competences in polymers, in particular thermoplastic ones, biopolymers, the most common processing techniques, such as extrusion, injection moulding, cast filming, compression moulding. Technical and coordination activities in several European, national and Piedmont Region collaborative research projects.

What are you looking for: New contacts in the plastic materials sector, especially in relation to biopolymers and recycled materials. New opportunities for collaborative international projects and research activities.

University of Gastronomic Sciences

Contact person: Gabriele Cena

Country: Italy

Website: <https://www.unisg.it/>

Università di Scienze
Gastronomiche di Pollenzo
University of Gastronomic Sciences of Pollenzo

Activity: We work to develop teaching research and development projects on issues of sustainability of the agribusiness supply chain and food system. We are the the first university in the world to exclusively focus on the transdisciplinarity of food.

Skills: we train new professionals in the food system, develop research and development projects and professional training on the issues of sustainability and circular economy for food

What are you looking for:

Companies with which to develop research and development projects, who can hire our students and host our students on international educational trips

For registrations and meeting requests:
