

# DIGI ENE Development Projects

An update on implementation

# What are DIGI ENE Development Projects, and what are they doing?

Development projects are small initiatives supported by DIGI ENE aiming at **developing and/or experimenting processes and practices** to expand digital education and learning inside the Centre of Excellence.

DIGI ENE supports them in the implementation of their action plans through a **capacity building programme** focusing on different areas and **customised support** in relation to their specific objectives.

**Centre of Excellence in  
Energy and Construction -  
Moldova**

Providing students with the skills  
to create quality digital content

Involvement of other VET schools

Very innovative - Getting  
additional resources to further  
expand it to a wider network of  
schools

**KNEC (South Africa), IP  
Nacala (Mozambique) and  
IP Nhamatanda  
(Mozambique)**

Overarching project with multiple objectives

Digital readiness assessment,  
Development of Digital Strategy  
Action Plan, Teacher training

Cross-country initiative  
coordinated by Humana network

**LEPL Ivane Javakhishvili  
Tbilisi  
State University Media and  
TV Art College**

Addressing students lack of  
engagement in online work

Digitization of audio-video  
materials

Teacher training

## **UNEC Lifelong Learning Centre**

Addressing vulnerable groups and  
adult digital competencies and  
skills' gap

Scaled up to regional project  
through support of DIGI ENE 2

Partnership with National  
Employment Agency

# How will Development projects feedback to DIGI ENE members

**Report with the results** of all Development projects will be distributed

Development projects will deliver **specific presentations** on the most innovative / interesting results of their projects during the future DIGI ENE webinars

Opportunities for **cooperation / networking** with other members of ENE network
