WEBINAR

Artificial Intelligence for Educators: ethical challenges, practices and guidelines

12 JUNE 2023, 14:00 – 16:00 CEST

ONLINE

Organized by the ETF Community of Innovative Educators

SUMMARY

The recent raise of conversational Artificial Intelligence (AI) applications such as ChatGPT are raising questions among educators and education leaders. Is it possible to integrate these tools safely and effectively in teaching settings? How to deal with AI-related plagiarism? Should these tools be banned from schools? How to build critical knowledge on AI systems among educators, to make sure that the management of educational data is secure, privacy-proof and used for the common good?

AI tools can potentially enhance teaching, learning and assessment, but at the same time they must be handled with care, to avoid harmful consequences.

The webinar will focus on the concept of **Ethical Artificial Intelligence**, that is the development, deployment and use of AI that ensures compliance with ethical norms, principles and core values. Specifically, the recent "**Ethical guidelines on the use of artificial intelligence and data in teaching and learning for educators"** by the European Commission will be presented and illustrated with practical examples.

At the end of the webinar, an open session will take place to collect ideas from the members of the EYF Community of Innovative Educators on new activities to be developed within the community.

AGENDA

Time	
14:00 - 14:05	**Welcome and news from the ETF Community of Innovative Educators** Fabio Nascimbeni, ETF
14.05 – 14.25	**Setting the scene: the impact of Artificial Intelligence on educators' work** Andrea Biancini, Bocconi University
14:25 – 14:45	**Cases of AI use from ETF Partner countries' educators** *Navigating the Ethical Challenges of Artificial Intelligence in Education: Best Practices and Guidelines* Ilgar Zarbaliyev, Head of Curriculum, New Zealand Enterprise DNA Educational Platform *Generative AI (ChatGPT): Enhancing Education from Both Sides of the Coin* Boshko Koloski, Jožef Štefan Institute, North Macedonia
14:45 – 15:15	**The "Ethical guidelines on the use of artificial intelligence and data in teaching and learning for educators"** Maria Gkountouma, European Commission Questions and Answers
15:15 - 15:30	**Open Discussion**

15:30 - 16:00	**Open co-creation session with the use of visual tool:** What support do educators need to properly embed AI in their work? What can the ETF Community of Innovative Educators do in this respect?
