

ADEEL TARIQ

Senior Researcher

**Lappeenranta-Lahti University of
Technology (LUT)
Finland**

Dr. Tariq is an enthusiastic academic with considerable teaching and research experience in higher education. His passion combined with years of experience in Technology and Innovation

Management research has enabled him to be a mindful teacher and researcher. He has published his research in several international reputable journals such as Journal of Intellectual Capital, and Technological Forecasting and Social Changes, among others. Throughout his professional career, Dr. Tariq has held a different position in the public and commercial sectors in a number of countries, including South Korea, Germany, Thailand, Pakistan, and Finland. Dr. Tariq has conducted several training programs in collaboration with public sector and private sectors.

He is also actively contributed to different European Union projects as a principal investigator and contributor.

- In Erasmus + project ArtIST, 2020-2023, he contributed as a principal investigator with multiple actors from Netherlands, France, Italy, Hungary, Finland, and Lithuania. The project was focused on the development and modernization of relevant STE(A)M subjects in multidisciplinary programs, such as business, innovation, and entrepreneurship.
- In another Erasmus Project (ongoing) VOIS, 2022-2024, he is contributing to the agri-business SME's capacity enhancing project where academia and corporates from Poland, Portugal, Germany, Finland, Greece, and Croatia are collaborating. Project aims to enable SMEs in no- and low-tech SMEs related with agro-alimentary production and bioeconomy active engagement in relevant innovation and ensuring innovation-based sustainability of their businesses. Within the project, the VOIS partnership is developing a comprehensive Virtual Open Innovation Environment allowing agri-business SMEs to, in an effective way, improve their open innovation competencies and ability to implement open innovation in their firms.
