THE KNOWLEDGE PACKAGES

[IntVE Knowledge Packages | ETF](#)

Package 1

Strengthening private sector partnerships for impactful training that meets labour market and societal needs

Package 2

Building skills ecosystems for innovation, smart specialisation and socio-economic development

THE KNOWLEDGE PACKAGES

Two knowledge packages:

- Strengthening private sector partnerships for impactful training that meets labour market and societal needs
- Building skills ecosystems for innovation, smart specialisation and socio-economic development

Three stations with:

- Tips
- Resources
- Case studies

The routes to vocational excellence

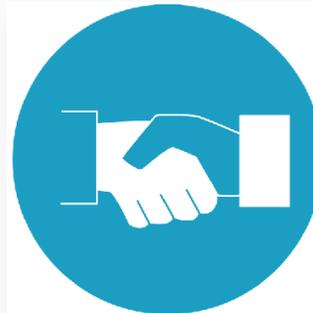

There are multiple pathways to achieving vocational excellence, and each centre will progress at its own pace. However, when it comes to partnerships, every centre will inevitably pass through key 'stations', including collaboration, the development of training programmes, and the delivery of training:

Station 1: Building sustainable partnerships with the world of work

Station 2: Developing future-proof curricula with the input of the private sector

Station 3: Delivering high-quality (work-based) training in collaboration with the private sector

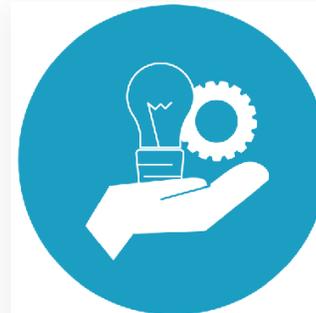

The three 'stations' to pass

Station 1: Building sustainable partnerships with the world of work

What does this station offer?

Resources to help centres organise themselves internally and find (private sector) partners. It provides inspiration on how to set common goals, have a clear vision and create win-win conditions for sustainable collaboration.

Station 2: Developing future proof curricula with the input of the private sector

What does this station offer?

Resources on how to improve training programmes with private sector input, including examples on collecting labour market data and designing responsive training.

Station 3: Delivering high quality (work-based) training in collaboration with the private sector

What does this station offer?

Practical resources for implementing (international) work-based learning through placements in companies and training centres for both students and teachers. It includes different approaches to involving the private sector in the provision of training, with the aim of achieving mutually beneficial outcomes.
